PRACTICAL NO. 1

Ques-1 - Importance of legal profession and laws relating to legal profession in India

Ans. I) Introduction - Various branch of studies deals with the specific study of which they are specialised for eg. A medical practitioner can deal only in the line of medicine, an engineer deal only in his limited scope of engineering but a lawyers deals with the all fields of society including science, social values, human rights, banking, Intellectual Property etc.

As famously said, "A lawyer should know something about everything and everything about something."

II) Importance of legal profession -

1) The legal profession is a profession of great honour -

Thus, the legal profession is a profession of great honour. It has been created not for private gain but for public good. It is not a money-making occupation but a branch of administration of justice. since it is a business, a lawyer cannot solicit work or advertise either directly or indirectly. An advocate is an officer of the court and required to maintain towards the court a respectful attitude bearing in mind
